

Internship *Industrial Design*

Are you highly curious, a strong storyteller, and equally happy thinking as well as making? Evolve is collaborative by design, which creates an ideal environment for you to work on a range of projects and develop your skills by learning from some of the best in the industry.

Let's make something meaningful...

Internships at Evolve provide broad exposure across multiple product and service categories. You will be actively involved on live project work ranging from tactical product-to-market projects through to strategic design programs focused on future innovation.

What to expect:

- Exposure to a range of tools (e.g. Rhino, Keyshot, and Adobe Creative Suite)
- Hands-on sketching, prototyping and model making
- Uncovering insights and generating concepts to help us drive projects forward

Internships at Evolve are mutually beneficial, we look forward to leveraging your past experiences and providing opportunities for you to learn and grow.

How to apply:

- Currently enrolled in or a recent graduate of accredited University in Industrial Design or equivalent
- A portfolio, process samples or an online portfolio demonstrating experience in Industrial Design
- A cover letter that describes your goals for your internship with us
- A current resume (CV)

No candidate will be considered without providing work samples or case studies.
